

Spinal Immobilization – Supine Patient

Random
Station #:

Date: ____/____/____ Test Site Location: _____

Candidate's Name: _____ #: _____ End Time: _____

Evaluator's Name: _____ Start Time: _____

Total Time: _____

	Points Possible	Points Awarded
Takes, or verbalizes, body substance isolation precautions	1	
Candidate places/maintains head in the neutral in-line position	1	
Turns over c-spine and directs assistant to maintain manual stabilization of the head	1	
Assesses motor, sensory, and circulatory function in each extremity	1	
Applies an appropriately sized cervical collar	1	
Directs movement of the patient onto the board without compromising the integrity of the spine	1	
Applies padding to voids between the torso and the board, as necessary	1	
Immobilizes the patient's torso to the long board	1	
Secures the patient's legs to the board	1	
Evaluates and pads behind the patient's head, as necessary	1	
Immobilizes the patient's head to the board	1	
Reassesses motor, sensory, and circulatory function in each extremity	1	
TOTAL:	12	

OP OF

Critical Criteria: (You must thoroughly explain your reason for checking any critical criteria on the back of this sheet)

- ☐ 181- Did not immediately take manual immobilization of the head
- ☐ 182- Released, or ordered release of, manual immobilization before head secured to backboard
- ☐ 183- Patient manipulated, or moved excessively, causing potential spinal compromise
- ☐ 184- Patient moves excessively up, down, left or right on the board after immobilization
- ☐ 185- Head immobilization allows for excessive movement
- ☐ 186- Upon completion of immobilization, head is not in neutral position
- ☐ 187- Did not assess motor, sensory, and circulatory function in each extremity before and after immobilization to the board
- ☐ 188- Immobilized head to the board before securing the torso and legs
- ☐ 189- Did not receive 10 or more points
